REMARKS

Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art 2. of record does not teach or suggest an address translation module configured to provide an address in an access request as an absolute address when the request is for one section of memory, but if the request is for another section of memory, to generate an absolute address from the address in the access request, the request including a segment identifier and an offset, by processing both the segment identifier and the offset to generate an absolute address. The arguments of Applicant's representative submitted in the paper of July 19, 2004 are convincing. In that paper, it was argued that in DeSota the address translation is done by replacing the original base portion, but the index portion is not changed in the translation (see arguments page 9 lines 18-23, and page 10 lines 5-10). That is, as shown in DeSota Fig. 9B, the translated address only processes the base: the index passes through to the translated address unchanged. This passing through of the index could not properly be read on the present claims since as argued this does not involve processing the index (or offset) as claimed. Thus it is noted that in the determination of the translated address in the description of the present invention, as described at page 15 lines 14-27, and shown in Fig. 2A at 112-113, the adding of the offset to the shifted pointer is not merely the appending of the offset to pointer in a manner similar to the appending of the index to the translated base in DeSota (this point specifically argued as not teaching the invention), but rather is to be considered an addition process.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance"

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary J Portka whose telephone number is (521) 272-4211. The examiner can normally be reached on M-F 9:30 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mano Padmanabhan can be reached on (521) 272-4210. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
